

VIVIO™ JUNIOR

Cough Syrup with strawberry and honey flavour for Children

A cough is a physiological defence mechanism of our body to clear the throat and respiratory tract of external substances. Its aim is to clean and protect the respiratory tract from irritating agents or infections, which are very common during the winter. So, it is necessary to modulate the cough to prevent irritation and discomfort, but it is not correct to eliminate it completely.

VIVIO Junior Cough Syrup is a 100% NATURAL and PRESERVATIVE FREE syrup that has been formulated for the treatment of any cough, both for dry and productive cough.

In the case of dry cough, VIVIO Junior Cough Syrup forms a protective barrier on mucous of pharynx, thanks to the xanthan gum and arabic gum action, which protect the throat from the contact of irritant agents and pathogen microorganisms, relieving its irritation and maintaining it hydrated and lubricated.

At the same time, VIVIO Junior Cough Syrup hydrates and reduces the viscosity of the mucus to promote its expulsion thanks to cane sugar, which stimulates salivation and increases the water content in the mucus to make it more fluid. Its exclusive formula based on marshmallow natural extract, with honey and strawberry aroma, complete its formulation giving it a fresh and pleasant taste.

In this way, VIVIO Junior Cough Syrup provides a sensation of calm, hydration and protection of the upper respiratory tract, modulating the cough without suppressing it to respect its function of defence of the respiratory tract.

Presentation:

Cough syrup of 182 g (approximately 140 ml) in glass bottle.

Composition:

Cane sugar 60%, purified water, honey powder, marshmallow 1% (*Althaea officinalis* dry extract), citric acid, xanthan gum 0.05%, arabic gum 0.05%, strawberry aroma and mix of natural tocopherols.
